***Providing Innovative Products
of Unsurpassed Quality***

Proudly Celebrating over 20 Years Serving Canadians

Professional Orthopedic Products

Professional Orthopedic Products (POP) has been a leading provider of Orthopedic, Sports Medicine, and Restorative products throughout all of Canada since 1996.

We import and distribute high-quality brands from around the world such as Medical Specialties, Restorative Medical, Scotts/CMO, Allard/CSUS, Orliman, Basko, and Elite Orthopedics just to name a few.

Many physicians, orthotists, physiotherapists and athletic therapists recommend our products for their patients. Consequently, our products are used by professional athletes from the NHL, the NBA and the CFL as well as hospitals, universities and the Canadian Armed Forces.

From lower extremity to upper extremity to such well known products as the ASO Ankle Brace, at Professional Orthopedic Products, we are dedicated to providing the highest quality of products and exceptional customer service.

If you would like more information about our products or are interested in a free in-service at your location, please call our office toll-free at 1-866-334-4441 or e-mail us at csr@poportho.com. Our dedicated and knowledgeable representatives are at your service. You can also visit us online at www.poportho.com.

Thank you for your interest in Professional Orthopedic Products and we hope to include you among our many satisfied customers.

ASO® EVO® - Ankle Stabilizing Orthosis

Patented design enables the ASO® EVO® to comfortably provide greater support than the original ASO® and better protection against high ankle sprains. Features an internal stirrup, & external stabilizing straps and dynamic cuff.

The ASO® EVO® is bilateral and is available in sizes ranging from X-Small to XX-Large

EVO® Speed Lacer™ - Ankle Stabilizing Orthosis

Has the same internal stirrup, external stabilizing straps, and dynamic cuff as the EVO® with the addition of a speed lace closure that offers a faster application.

The EVO® Speed Lacer™ is bilateral and is available in sizes ranging from X-Small to XX-Large

ASO® - Ankle Stabilizing Orthosis with Stays

Has the same great features of the original ASO® along with the addition of removable plastic stays which allow for enhanced proprioceptive support.

Available in sizes ranging from X-Small to XX-Large

ASO® Speed Lacer™ - Ankle Stabilizing Orthosis

Has the same great features as the original ASO® with the addition of the speed lace closure mechanism that offers a faster application.

The ASO® Speed Lacer™ is bilateral and is available in sizes ranging from Pediatric to XX-Large

EVO® Quatro™ - Ankle Stabilizing Orthosis

Low profile version of the EVO®. Ideal for athletes or patients that do not tolerate bulky materials inside their shoes. Features an internal stirrup, & external stabilizing straps and dynamic cuff.

Available in sizes ranging from X-Small to XX-Large

OS6240 Elastic Ankle Support with Gel Pads

Pull-on ankle sleeve made of a breathable stretch knit fabric. Includes two viscoelastic gel pads which redistribute compression from the malleolus to the surrounding tissue area. The massaging effect of the compressive fabric and padding stimulates faster reabsorption of bruises and swellings.

Available in sizes ranging from Small to Large

TOB-500N Crossover Elastic Ankle Support

Sock-type ankle support made of soft elastic. Features figure 8 straps that allow adjustable compression and support.

Available in black or beige in sizes ranging from X-Small to X-Large

TGO490 TheraGo Functional Elastic Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

ACE902 Actius Elastic Ankle Support

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indications include: Mild injuries and sprains; Dislocations; Support and protection during sporting and work-related activities.

Available in sizes from Small to Large

Phantom Dorsal Night Splint

The comfortable low-profile design enhances your patient compliance. Padded internal dorsal stays to increase or decrease dorsiflexion. Non-skid material on sole provides better traction when ambulating.

Available in sizes from Small to XX-Large

RMI SafeBoot II

Flanged heel elevates the heel and relieves the pressure thereby preventing development of heel ulcers and allows for healing of pre-existing ulcers. The SafeBoot II keeps patient's foot in dorsiflexion which prevents drop foot or heel cord contractures. The rotator bar, when extended either medially or laterally, inhibits any internal or external rotation at the hip and therefore prevents hip contractures.

Available in adult sizes Small to X-Large as well as Pediatric sizes 3" to 8".

Elements Stretch-UP

Sock style treatment for plantar fasciitis. Keeps tension on the plantar fascia so it heals in a stretched position at night.

Bilateral design available in Sizes from Small to Large

AB100 Boxia Plus

The Boxia Plus allow patients to be autonomous and independent because of the new semi-automatic, one-handed closing system so they can enjoy a better quality of life in their day-to-day activities. It features a pad in the back that hugs the Achilles tendon, provides maximum comfort and distributes pressure. There are also relief points offering a massage effect on the soft parts. The central anchoring system can be adjusted to the ankle perimeter to guarantee the most adequate position for each patient.

Sizes ranging from Small to Large.

FSX Pneumatic Walker

Durable, semi-rigid shell helps support the limb while providing full-shell protection. The integrated inflation system for separate medial and lateral air bladders means no need for a separate air pump. The low-profile rocker sole enables a natural gait pattern. Features a covered toe pad for additional protection.

Available in low-top and high-top versions in sizes ranging from Small to Large.

Advantage III - Fixed Walker

An extremely lightweight and superior strength fracture walker constructed of durable, malleable aluminum uprights that can be formed for a customized fit with a premium softgood liner that provides additional comfort. The ultra-low heel height and rocker sole facilitates a normal gait pattern. Available in both a high-top and low-top version.

Sizes range from Small to Large

M2 Night Splint

Helps stretch the plantar fascia with the adjustable bilateral dorsiflexion straps.

Bilateral design available in sizes Small to Large

TGO484 TheraGo Functional Calf Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

ACE804 Actius Elastic Calf Support

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indications include: For protection of the anterior tibial spine; Indicated for muscle diseases; Support and protection during sporting and work-related activities.

Available in sizes from Small to Large

Gripper™ - 12" and 16" Hinged Knee Brace

Provides medial and lateral stability and resists distal migration due to an internal Skinloc™ pad. Wrap-around anterior closure allows for ease of application and optimal fit. Open popliteal minimizes material bunching.

Available in CoolFlex in 12" or 16".

Available sizes range from X-Small to 5X-Large

Patellavator™ - Knee Orthosis

Has a unique design that applies variable pressure to the patellar tendon without creating a tourniquet around the leg or irritating the popliteal. Low profile design eliminates irritation to the opposite leg.

Available in sizes Small to 2X-Large

DynaTrack™ Plus - Patella Stabilizer

The DynaTrack™ Plus Patella Stabilizer contains medial and lateral plastic hinges which enhance the brace's ability to conform to the knee during flexion. Dynamic buttress, lined with our patented Skin-Loc™ material applies continuous pressure to the patella during full range of motion of the knee. Open Popliteal permits a high degree of flexion with no discomfort.

Available in both CoolFlex and Neoprene material.

Available in ranging sizes from X-Small to 3X-Large.

DynaTrack™ with Hinges - Patella Stabilizer

The DynaTrack™ with Metal Hinges has the same patented design as the DynaTrack Plus with the addition of medial and lateral metal hinges for extraordinary stability.

The DynaTrack™ with Metal Hinges must be purchased in a left or right configuration. The left configuration applies pressure to the lateral aspect of the patella on the left knee and the right configuration applies pressure to the lateral aspect of the patella on the right knee.

Available in sizes from X-Small to 2X-Large

OS6211 Elastic Knee with Lateral Stabilizers

Manufactured in a breathable stretch knit material. Includes a viscoelastic pad and lateral metal stabilizers for improved medial/lateral control. The compressive fabric and viscoelastic pad improves circulation and helps to reduce swelling.

Sizes range from Small to Large

K80032 Post-Op Adjustable Knee Brace

Designed to provide controlled range of motion for patients recovering from knee surgery or those who have knee injuries or instabilities. Comfortable, simple to apply and extremely lightweight. Telescoping bars are easily adjusted for a personalized fit. Drop lock features allows brace to be locked out with the push of a button. Easy to use ROM hinge with quick adjusting flexion and extension stops to control and limit knee flexion and extension.

Available in one Universal size.

9104 Rodisil Closed Patella Knee Brace

Three-dimensional fabric provides a therapeutic compression of 20.33mm to 36mm Hg. Viscoelastic buttress helps stabilize as well as massage the patella to reduce swelling. Metal side stabilizers help to prevent distal migration.

Available in sizes from X-Small to 4X-Large

9106 Rodisil Closed Patella with Metal Hinges

Three-dimensional fabric provides a therapeutic compression of 20.33mm to 36mm Hg. Bilateral polycentric metal hinges control medial/lateral instabilities. Silicone pad massages the patella to reduce swelling.

Available in sizes from X-Small to 4X-Large

AKS™ with Plastic Hinges - Knee Support

Distal and proximal openings allow for easy application to fit various patient shapes. Soft horseshoe buttress is repositionable. Internal SkinLoc™ pad and plastic hinges function synergistically to resist distal migration and vertical bunching.

Sizes X-Small to 3X-Large.

AKS™ with Metal Hinges and Straps

Distal and proximal openings allow for easy application to fit various patient shapes. Soft horseshoe buttress is repositionable. Internal SkinLoc™ pad and metal hinges function synergistically to resist distal migration and vertical bunching.

Available in sizes ranging from X-Small to 3X-Large.

ACE803 ELASTIC KNEE SUPPORT w/ STABILIZERS

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indicated for Arthritis and osteoarthritis, mild bruising, inflammatory processes and support during sporting and work-related activities.

Available in sizes ranging from Small to Large

ACE802 ELASTIC KNEE SUPPORT

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indicated for Arthritis and osteoarthritis, mild bruising, inflammatory processes and support during sporting and work-related activities.

Available in sizes ranging from Small to Large

KC64-PC "Knee Mate" Wrap-Around with Hinges

Large, comfortable popliteal and patellar openings for position and comfort. Wrap-around design for easy application. Covered, stainless steel, light-duty hinges with hyperextension stop.

Indicated for Arthritis; post-op Management, mild to moderate anterior/posterior cruciate instability, and medial/lateral instability; general overall knee support.

Available in sized ranging from X-Small to 4X-Large

KC64-SL "Super-Lite" Wrap-Around Knee Brace

7 oz "Super Lite" Knee Orthosis. Front hook & loop closures with Popliteal opening. Latex-free

Indicated for mild ligament instabilities; Meniscus injuries; general knee support; post-operative and rehabilitation phases; very mild Osteo-Arthritis.

Available in sizes X-Small to 4X-Large.

TGO480 Functional Elastic Knee Support with Strips

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

TGO487 Functional Elastic Knee Support with Joints

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

TGO481 TheraGo Functional Elastic Thigh Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

ACE801 Actius Elastic Thigh Support

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indications include: Prevention of muscle tears, especially in the quadriceps and abductors; Support and protection during sporting and work-related activities.

Available in sizes from Small to Large.

Loving Comfort Maternity Support

Maximum comfort for women with moderate symptoms. The Loving Comfort Maternity Support is made from lightweight ventilated elastic that is cool and feather soft to the skin.

Available in pre-pregnancy dress sizes from Small to Large

Reinforced Hernia Truss with Velcro Fastening

Elastic belt with Velcro fastening, anatomic cushions extended with straps under the buttocks and fixed to the sides.

Indicated for bilateral reducible inguinal hernias; compression and reduction of hernias; maximum containment and comfort.

Models available:

B-110:Bilateral / D-111:Right / I-112:Left

Sizes range from 70 cm to 120 cm of waist circumference.

Back-n-Black™ Back Support

Patented design includes anterior and posterior panels combined with inelastic nylon strapping increases intra abdominal pressure thereby decreasing the load on the lumbar spine. Breathable elastic panels enhance patient compliance.

Available in Regular, Low Profile, Dual Panels, or Thermoformable Pockets.

Available in sizes ranging from Small to 3X-Large.

Sacroiliac (SI) Belt

Made from an inner latex-free elastic belt with strategically placed Skinloc™ pads along with an outer nylon belt. The hi-density foam pad can be used to provide additional pressure on the sacrum.

Comfortable enough to be worn directly next to the skin.

Available in sizes Small to 2X-Large.

EV-300 Semi-Rigid Lumbar Back Support

Lumbosacral orthosis fabricated from dense elastic material providing adjustable compression for greater lumbar containment. Incorporating a semi-rigid posterior with four malleable steel stays, threadless seam technology and a removable lumbar cushion. Also featuring a specifically designed fastening system for ease of fitting for patients with limited dexterity.

Sizes 2X-Small to 2X-Large

E-240 Strong Shoulder Support

Made up of two cotton elastic straps as well as independent rings for each side of the shoulders. The straps exert a gradual pull on the shoulders aiding in the correction of Kyphotic posture.

Available in sizes X-Small to 2X-Large.

Shoulder Immobilizer

Soft padded shoulder strap provides exceptional comfort while the soft padded waist strap restricts abduction and external rotation of the shoulder. The shoulder and waist strap are now made from new material that provides greater durability as well as resistance to stretching. The new material used in the envelope is also more durable, yet very comfortable and breathes well. Bilateral design fits right or left shoulder.

Available in sizes X-Small to X-Large as well as a Universal size.

POP Padded Arm Sling

Designed to provide an optimum level of comfort and shoulder stabilization. Features a soft, padded shoulder strap, thumb loop, stretch-resistant, lightweight, breathable material. Latex-free

Available in sizes from 2X-Small to X-Large as well as a Universal size.

Vission Mesh Contoured Sling

Unique anatomical contour prevents the arm from sliding in the sling. Comfortable open mesh provides optimum in breathability. Includes a soft plush thumb loop.

Available in sizes Small to X-Large.

TGO330 Functional Elastic Shoulder Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

OS6230 Elastic Elbow Support with Gel Pads

Controlled compression provides pain relief. The viscoelastic gel pads redistribute the compression from the prominent epicondyles to the surrounding soft tissues and provide an intermittent massage.

Sizes range from Small to Large.

Epitex Fix Epicondylitis Armband

A molded and shaped thermoplastic cuff lined with silicone beads adheres to the skin without applying undue pressure. The brace is made to be easily adjustable and extremely comfortable to wear.

Comes in one Universal size.

Also available in green.

Cubital Tunnel Brace

The Cubital Tunnel Brace is a low-profile night splint that comfortably holds the elbow in a neutral position for the treatment of cubital tunnel syndrome. Ventral design, with no exposed rigid materials, enhances patient compliance during sleep. Adjustable aluminum stay allows the elbow to be positioned at the optimum angle.

Available in sizes Small/Medium and Large/X-Large

TGO340 TheraGo Functional Elastic Elbow Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

EpiGel™ Elbow Support

A comfortable, low profile design that aids in the treatment of tennis elbow (lateral epicondylitis) or golfer's elbow (medial epicondylitis). The EpiGel elbow support provides relief with two adjustable gel pads that compress the extensor and flexor muscles without creating a tourniquet around the forearm. The soft gel pads also dampen vibration. The patented strap retention system allows for easy application.

Comes in one Universal size.

ACE401 Actius Elastic Elbow Support

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort.

Indications include: Lateral and medial epicondylitis; Tendinitis; Mild bruising; inflammatory processes; Support and protection during sporting and work-related activities.

Available in sizes Small to Large

8" Wrist Lacer™ II - Wrist Support

The new 8" Wrist Lacer™ II provides equal tension across all four laces to easily generate uniform compression along the wrist support. The polypropylene felt liner and perforated suede allow moisture to evaporate away from the skin and the blue palmar pad offers enhanced support by matching the contour of the palm. The dorsal and palmar aluminum stays are removable to allow bending by a medical professional to create a custom fit.

Sizes from Pediatric to 2X-Large

10½" Forearm Lacer II

The new 10½" Forearm Lacer II provides equal tension across all four laces to easily generate uniform compression along the wrist support. The polypropylene felt liner and perforated suede allow moisture to evaporate away from the skin and the blue palmar pad offers enhanced support by matching the contour of the palm. The dorsal and palmar aluminum stays are removable to allow bending by a medical professional to create a custom fit.

Sizes from Small to X-Large

Ryno Lacer® II Short - Wrist and Thumb Support

The new Ryno Lacer® II Short provides equal tension across all laces offering supreme comfort, ease of application and superior immobilization of the wrist and thumb. The tension can be easily adjusted for those patients with disproportionate forearm and wrist circumferences. The dorsal, palmar and radial aluminum stays are removable to allow bending by a medical professional to create a custom fit.

Available in sizes X-Small to X-Large

Ryno Lacer® II Long - Wrist and Thumb Support

The new Ryno Lacer® II Long provides equal tension across all laces offering supreme comfort, ease of application and superior immobilization of the wrist and thumb. The tension can be easily adjusted for patients with disproportionate forearm and wrist circumferences. The dorsal, palmar and radial aluminum stays are removable to allow bending by a medical professional to create a custom fit.

Available in sizes X-Small to X-Large

Compressor Wrist Support

The compressor strap on this wrist support provides compression along the carpal region. It works in conjunction with the plastic stays to create a functional wrist support that limits the range of flexion and extension of the wrist. The patented strap retention system on the end of the compressor strap allows for ease of application.

Left and Right sizes Small to X-Large.

Motion Manager® - Wrist Support

This neoprene wrist support is an excellent choice for providing functional motion. The contoured plastic palmar stay and the multi-density dorsal stays offer adjustability to provide the optimum level of flexion and extension control. A low profile design allows the range of motion needed to return to work safely. Bilateral design fits left or right hand.

Sizes X-Small to X-Large

Tripod™ 8" Wrist Lacer

In addition to flexion-extension control, the Tripod Wrist Lacer resists radial-ulnar deviation. Ulnar, palmar and dorsal aluminum stays work in concert to restrict radial-ulnar deviation and minimize flexion-extension of the wrist. The polypropylene felt liner and perforated suede allow moisture to evaporate away from the skin and enhance patient compliance. The adjustable thumb strap permits unrestricted motion of the fingers.

Available in Left and Right sizes X-Small to X-Large as well as a Universal size.

M760 - Manutec Fix Immobilizing Wrist w/ Palm Splint

Wrist splint manufactured from breathable velour, made using the latest generation materials (triple layer: foam, velour, sponge), with a triple immobilization system comprising a malleable aluminum palm splint and medial-lateral anatomically shaped strips for adaptation.

Indicated for wrist immobilization; post-trauma; post-surgery; painful or swollen sequelae; instability; rehabilitation.

The M760 is available sizes: Small/Medium and Large/X-Large

OS6260 - Elastic Wrist Support

Stabilizes, supports, and provides compression to the wrist. The elastic strap can be loosened or tightened to achieve desired comfortable fit.

Bilateral design.

Available in sizes Small to Large

OS6261 - Adjustable Wrist

Provides comfortable compression and support. Bilateral design fits both left and right sides.

One Universal size for all wrists.

ACE501 Adjustable Elastic Wrist Band

Made from breathable elastic, it is lined with a highly resistant soft and stretchable fabric that provides greater comfort. Indicated for prevention of wrist injuries. Tendinitis. Support and protection during sporting and work-related activities.

Bilateral design fits both left and right wrist.

Universal size to reduce inventory

TGO350 TheraGo Functional Elastic Wrist Support

The multi-directional compression provided prevents liquid build-up, reduces stress on the soft tissues and stimulates proprioceptors, thereby enhancing articular function and muscle co-ordination. In addition, it optimises blood circulation and facilitates body temperature regulation.

Available in sizes from X-Small to X-Large

Restorative Hand

Heat moldable to provide mild stretch on the joints then remold to gradually correct joint to normal alignment. Provides prolonged low load passive stretch to re-lengthen shortened tissue. The splint is lined with Outlast temperature regulating material to not cause unwanted heat.

Color-coded straps aid in proper strap attachment.

Also available in a modified version with a dorsal attachment.

Available in Pediatric sizes from Infant to Youth as well as adult sizes from Small to Large.

POP Arthritis Compression Glove

The POP Arthritis Compression Gloves help to relieve the aches and pains, as well as the stiffness associated with arthritis of the hands and fingers. Our form-fitting gloves provide mild compression which helps to control the swelling and pain of the joints. The thermal lining holds in your body heat and helps to increase circulation and provide long-lasting relief. The textured palm provides a non-slip grip and open fingertips are convenient for everyday activities, allowing you to touch and feel without annoying barriers. All our gloves are latex-free. Sold by the pair.

Available in sizes XX-Small to XX-Large.

Boxer Splint

The Boxer Splint is easy to adjust and offers superior comfort and support to enhance compliance. It is indicated for fourth or fifth metacarpal fractures. The malleable palmar and dorsal aluminum stays are easily bent by a medical professional to create a custom fit. The molded plastic clamshell design protects and supports the fourth and fifth metacarpals without restricting the flexion of the MP joints.

Sizes Small to X-Large

CMCcare Thumb Brace

Contours around the first metacarpal to stabilize the CMC joint for pain-free motion.

The CMCcare restores proper alignment of the thumb for improved function.

Available in Left and Right sizes from Small to Large.

M780 Manutec Fix Rizart Plus CMC Thumb Brace

Stabilizes the base joint of the thumb and places the first metacarpal in its functional position. Places the thumb in an anatomically correct position and enables the other fingers to move properly, ensuring the functionality of the hand. The design with double injection of materials and the rounded edges guarantee maximum comfort of use. Fastening system, secured by a metal core, enables the degree of stability of the trapezio-metacarpal joint to be adjusted as required.

Available in Left and Right sizes Small to Large.

M770 Breathable Thumb Immobilizing Splint

Made of breathable velour. Consists of a malleable aluminum splint which can be molded to provide a custom fit. Latex Free. Bilateral design can be adapted for both the left and right hand.

Available in Small and Large

Universal Suede Thumb Support

Easy to apply, comfortable and low profile splint. Anatomically contoured aluminum stay and soft elastic closure straps comfortably immobilize the MP & CMC Joints of the thumb.

Bilateral design comes in one Universal size.

TeePee™ Thumb Protector

Three aluminum stays comfortably support the MCP joint. Each stay can be shaped and contoured to provide a custom fit. Fits either left or right thumb.

Bilateral design available in sizes X-Small to X-Large.

Professional Orthopedic Products carries the following brands:

Elite Orthopaedics

Professional Orthopedic Products

Thank you for choosing Professional Orthopedic Products for your orthopedic, neurological, and sports medicine product needs. We appreciate and value your business and have assembled the following to make your ordering experience with Professional Orthopedic Products as simple and clear as possible.

OUR MISSION STATEMENT

At Professional Orthopedic Products, we are dedicated to providing high quality orthopedic, neurological, and sports medicine products while maintaining high standards of customer service.

DEDICATED CUSTOMER SERVICE

Telephone: (514)-484-4441 Toll Free: 1-866-334-4441
Fax: (514)-484-4431 Toll Free Fax: 1-888-484-4431
E-mail: csr@poportho.com

All orders should be faxed or e-mailed to ensure accuracy. For your convenience, we can supply you with an order form upon request. In most cases, orders received before 3:00 PM EST will be shipped out the same day.

WARRANTY

All products sold by Professional Orthopedic Products have a limited warranty against defects in materials or workmanship for a period of six months from date of purchase. Before returning a product you believe is defective, you must contact Professional Orthopedic Products for a Return Authorization number. After receipt and inspection of the product, should the product prove to be defective, we will repair or replace it at no charge. This warranty is limited to materials and workmanship only, and does not include failure due to wear, incorrect laundering, or improper fitting. Please note that all the returns **MUST** be accompanied by a dated proof of purchase to be eligible for a credit or exchange.

RETURN POLICY

Before returning or exchanging any product for reasons other than a defect, you must contact Professional Orthopedic Products for a Return Authorization number. This will insure prompt and accurate credit or replacement. Returns and exchanges will only be accepted within sixty days from the date of purchase and will be subject to a 25% restocking fee. Custom products, discontinued products, products that have been changed in material or design or products that have been worn may not be returned or exchanged for any reason other than POP's error. Please note that all the returns for reasons other than defects must be accompanied by a dated proof of purchase and must be returned with all the original packaging intact to be eligible for a credit or exchange.

CREDITS

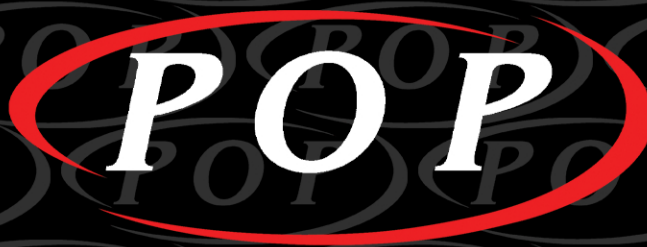

Credits will be mailed to you as soon as they are issued. For your convenience, we leave it up to you to inform us as to when and to which invoice you would like the credit applied.

In closing, we look forward to serving you and to a long and prosperous relationship.
